**Thank you for joining
Trout Unlimited**

MEETINGS

The **Forks of the Delaware** chapter meets on the first Wednesday of the month, September through June at Stockertown Rod & Gun Club, LeFevre Road, 7 p.m.

**FORKS OF THE
DELAWARE
CHAPTER #482**

“Conserving, protecting, and restoring North America’s coldwater fisheries and their watersheds”

**FORKS OF THE DELAWARE CHAPTER
TROUT UNLIMITED
PO BOX 467
STOCKERTOWN, PA 18083**

WELCOME TO FORKS OF THE DELAWARE CHAPTER OF TROUT UNLIMITED

MISSION STATEMENT

The **Forks of the Delaware** Chapter of Trout Unlimited is dedicated to being a leader in coldwater conservation in the Bushkill Creek and Martins-Jacoby watersheds in Northampton County, Pennsylvania, and in its support of the National and State mission to conserve, protect and restore coldwater habitat and their fisheries.

WHAT WE DO

- Stream/Riparian Restoration
- Education & Advocacy
- Trout in the Classroom
- Adopt-A-Highway
- Stream Clean-ups
- Youth Events

THE WATERSHEDS

The **Bushkill Creek** rises at the base of the Kittatinny Ridge (locally known as "Blue Mountain") in Moore and Bushkill Townships, flowing south by southeast for about 20 miles before turning east to enter the Delaware River in downtown Easton. The Bushkill Creek watershed comprises about 80 square miles near the center of Northampton County. The Bushkill Creek is designated as high quality coldwater fishery (HQCWF). The upper section flows as a freestone stream through Jacobsburg Environmental Education Center where Sobers Run enters. The Little Bushkill enters in Stockertown. Below Tatamy, the stream is influenced by limestone springs, cooling the water and providing for a class A wild brown trout fishery. The headwaters contain a small population of brook trout worth protecting.

The **Martins-Jacoby** watershed, located in northeast Northampton County, is comprised of Martins Creek, its tributaries, Little Martins Creek and Waltz Creek, the Jacoby Creek, and other tributaries to the Delaware River. Both, Waltz Creek, which is HQCWF, and the smaller Slateford Creek, which is designated Exceptional Value (EV), could be a pleasant

surprise for fly fishermen used to tiny waterways. Martins Creek provides year-round fishing for wild and stocked trout with the fall and winter seasons being outstanding. Most of the streams are freestone with a few such as Mud Run, the lower portion of Martins Creek and Jacoby Creek having a limestone influence.
